

**A.K. Equipment would like to say Thank You for the continued business.**

**Agro-Culture LIQUID Fertilizers  
Ashley Manufacturing Facility  
140' x 380'**

"Agro-Culture LIQUID Fertilizers Ashley Manufacturing Facility is the 5<sup>th</sup> project that A.K. Equipment has completed for us. A.K. Equipment is a great project partner, as they are concerned not only with the buildings and their parts of the project, but also ensure that all of the process equipment, and site work is completed to our satisfaction. My only regret in the projects that we have done, is that we have not had them as the general contractor for the entire installation. I believe that they are capable of delivering a better finished product for us in the future, by coordinating all construction and setup activities. It is impossible to drive by the Ashley Facility and not be impressed by the quality of workmanship and design."

Thanks,  
Nick Bancroft  
Vice President of Operations and Organizational Planning  
Agro-Culture LIQUID Fertilizers
